Umair Ul Hassan

REACT NATIVE DEVELOPER — MOBILE

+92 347 3256547 | Lahore, Pakistan | umairulhassan.cs@gmail.com | github.com/umairulhassancs | linkedin.com/in/umair-ul-hassan-cs | umairulhassan.site

React Native developer with hands-on experience building cross-platform mobile applications using React Native, Expo, TypeScript, and Firebase. Experienced developing AI-powered mobile features, image-based recognition, AR plane detection, real-time data workflows, and multi-role application experiences. Integrates mobile applications with FastAPI/Node.js backends, Stripe payments, and computer vision services.

TECHNICAL SKILLS

Mobile / 3D	React Native, Expo, Viro React, Three.js
Languages	TypeScript, JavaScript, Python, Java
AI / Computer Vision	PyTorch, Vision Transformers (ViT), CNNs, LLM & Speech Integrations
Backend / APIs	FastAPI, Node.js, Express.js, REST APIs
Data / Cloud	Firebase Suite, PostgreSQL, MongoDB
Tools	Git, GitHub

EXPERIENCE

React Native Developer — **ANIMMZA**

React Native, Expo, TypeScript, Redux Toolkit, REST APIs, Mobile SDKs — *Jan 2025 – Feb 2026 | Hybrid, Lahore, Pakistan*

- Developed and maintained cross-platform mobile apps for iOS and Android using React Native and Expo, delivering native 60fps performance.
- Implemented pixel-perfect mobile interfaces, fluid gesture navigation, and reusable component libraries following mobile design guidelines.
- Integrated mobile clients with backend REST APIs, state management (Zustand/Redux), push notifications, and device hardware features.

Web Development Intern — **ARCH TECHNOLOGIES**

React, Next.js, Node.js, JavaScript, REST APIs — *Aug 2025 – Oct 2025 | Remote, Pakistan*

- Built responsive UI components and API endpoints, integrating frontend workflows with backend services.

SELECTED PROJECTS

GardenMate Ecosystem — **FINAL YEAR PROJECT**

React Native, Expo, PyTorch (ViT-B/16), Viro React AR, FastAPI, Firebase, Stripe — *2025 – 2026*

- Built an AI-powered, AR-integrated mobile gardening assistant and plant marketplace with 12+ specialized modules across four role-based portals (Customer, Vendor, Rider, Admin).
- Fine-tuned a Vision Transformer (ViT-B/16) model for 69 plant species and combined it with the PlantNet API in a 60/40 weighted ensemble, achieving ~350ms inference time.
- Implemented Viro React AR plane detection for a "Place Before You Buy" 3D plant-placement experience and a camera Snap-to-Autolist product listing workflow.
- Designed the marketplace commission engine with Stripe payment settlement and automated delivery fee calculations across Customer, Vendor, Rider, and Admin portals.

NutriLens AI — **MOBILE APPLICATION**

React Native, Expo SDK 54, Zustand 5, Firebase Realtime Database, OpenRouter AI — *2025*

- Built a cross-platform mobile nutrition application combining food photography and grocery barcode inputs for automated macronutrient tracking.
- Implemented clinical Mifflin-St Jeor metabolic expenditure calculations (BMR/TDEE) and an interactive AI dietitian coach powered by OpenRouter AI.

Vouch Keychain — **PERSONAL SAAS PRODUCT**

Next.js 16, React 19, TypeScript, Firebase Suite, Twilio, Resend, Three.js — *2026*

- Built and deployed a QR-based lost-item recovery SaaS product with privacy-preserving masked-contact communication, currently used by around 10 customers.
- Implemented real-time location-recovery telemetry, multi-channel alert dispatch via Twilio SMS/voice and Resend email, and an interactive Three.js 3D product visualizer.

FinGo Marketplace — **MULTI-VENDOR COMMERCE**

React.js, Node.js, Express.js, MongoDB, JWT — *2024*

- Built a multi-vendor commerce platform connecting retail and grocery stores with customers across Lahore, Karachi, and Islamabad.
- Implemented 3-tier role-based access control, secure JWT authentication with refresh-token rotation, and real-time inventory tracking.

ACHIEVEMENTS

Digital Pakistan Speed Programming Competition (DPSPC) — **TOP 50 NATIONWIDE**

National Speed Programming & Algorithmic Problem Solving Contest (~450 Teams) — *2025*

- Ranked among the top 50 teams nationwide out of ~450 competing teams in speed programming and algorithmic problem solving under strict time constraints.

InnovateX 2.0 Coding Competition — **GIFT UNIVERSITY**

Algorithmic Competitive Programming Hackathon — *2025*

- Competed in algorithmic coding challenges focused on data structures, time/space complexity, and efficient algorithm design.

EDUCATION

Bachelor of Science in Computer Science (BS CS) — **GIFT UNIVERSITY, GUJRANWALA**

Coursework: Software Engineering, Data Structures & Algorithms, Database Systems, Artificial Intelligence, Machine Learning, Computer Vision, Distributed Systems — *2022 – 2026*
